Name of Crew Leader	Address	Phone/Cell

<sup>1</sup> Applicant may be the collector, seed broker/conditioner, or other party. Membership in WCIA is included with this application. Information on this form is confidential and is for WSCS use only.

<sup>2</sup> In general., complete a separate application for each specific species (or recognized subspecies) site location. For species that occur in harvestable stands over broad non-contiguous areas, an application must be filled for at least each species/county area.

<sup>3</sup> GPS coordinates preferred if exact site of stand is known before harvest.

<sup>4</sup> List approximate number of acres or square miles if stand is mostly contiguous, or describe (or outline on topographic map) geographic area within county to be collected from (e.g. stream drainage, specific valley, mountain range, etc.). List MLRA zone, or other defined ecological area as applicable.

<sup>5</sup> For example, seed, seed stalks or heads, cutting or other vegetative part, cones, fruit, etc.

<sup>6</sup> Application must be completed and mailed with application fee to WSCS address preferably one month or more but at least one day before harvest (exceptions on a case by case basis and with time and mileage fees assessed). This initiates the wildland collected seed certification process and contact with collector groups. The WSCS will then verify collection site harvest by spot checks before, during, or post harvest utilizing detailed maps, GPS coordinates, and/or accompaniment with collector(s) to the site.

<sup>7</sup> List known collector groups that will be harvesting for you on this site (list additional groups and information on back of white copy). Maps, GPS readings, and other exact site location information relative to an individual collector are regarded as confidential.

I hereby apply for certification of wildland collected plant material from the above described site. I agree to abide by all of the rules and regulations governing certification according to the above named certification agency under the auspices of AOSCA, the Association of Official Seed Certifying Agencies.
